

APPARATUS, METHOD AND COMPOSITION FOR REPELLING ANIMALS**ABSTRACT OF THE DISCLOSURE**

An apparatus, method and composition for repelling animals are disclosed. The apparatus comprises a layer extracted from a plant of an Alliaceae family on a substrate, wherein the substrate is selected from the group consisting of plants, living animals and manufactured objects and combinations thereof. The method comprises extracting a plant of an Alliaceae family, Allium genus; and applying the extract to an exposed surface of a substrate, wherein the substrate is selected from the group consisting of plants, living animals, manufactured objects and combinations thereof. The composition comprises an extract of a plant of an Alliaceae family, Allium genus; and at least one egg, having a yolk portion.
